Mango

A mango is an edible stone fruit produced by the tropical tree Mangifera indica which is believed to have originated from the region between northwestern Myanmar, Bangladesh, and northeastern India.^[1] M. indica has been cultivated in South and Southeast Asia since ancient times resulting in two distinct types of modern mango cultivars: the "Indian type" and the "Southeast Asian type".^{[2][3]} Other species in the genus Mangifera also produce edible fruits that are also called "mangoes", the majority of which are found in the Malesian ecoregion.^[4]

Worldwide, there are several hundred cultivars of mango. Depending on the cultivar, mango fruit varies in size, shape, sweetness, skin color, and flesh color which may be pale yellow, gold, green, or orange.^[5] The mango is the national fruit of India, Pakistan and the Philippines,^{[6][7]} while the mango tree is the national tree of Bangladesh

It Is pleasure for us to submit this project report on “ Problems of Bangle Manufactures & Plastic Flower – A Case Study of Murgod Village”.

We express our gratitude to our guide **Prof M S Kammar** for guiding supporting and motivating of this research work. Also thankful to **Prof K .N Madar** who given this opportunity to make a project.

During the research we have drawn immense help, inspiration and research out put from bangle manufactures and plastic flower manufactures.it is great pleasure for us to express our deep sense of gratitude thanks to all manufactures.

Our heartfelt thanks to **Prof B B Budihal Principal**, GGD Arts, BMP Commerce and SVS Science College Bailhongal, **Prof K N Madar** HOD of Commerce for there valuable suggestion whole hearted support to complete this project successfully. Finally we are express thanks to”**Aspire Book House**” for providing reference books and who have directly and indirectly helped us in completion this project work.
